We are Hiring!

Position: OB/GYN Physician

Date Posted: October 12, 2020

Location: Pittsburgh, PA

Company: Allegheny Reproductive Health Center

Contact Person: Sheila Ramgopal

Job Keywords: physician, OB/GYN, abortion care

Description:

Allegheny Reproductive Health Center is seeking a physician. If you are seeking employment with flexible effort between 1.0 FTE to 0.5 FTE, then this is the place for you. A position with us would include full spectrum obstetrics and gynecology with providing abortion services up to 24 weeks.

Allegheny Reproductive Health Center has provided excellent abortion care since 1975 and now provides full spectrum reproductive healthcare that is comprehensive and patient centered. We have an opening for an OB/GYN or FP-OB fellowship-trained Physician who shares our commitment to reproductive healthcare, can provide abortion services, and practices obstetrics and gynecology. This person will also work collaboratively with midwives and nurse practitioners and provide LGBTQIA+ care. We believe that all people must have access to patient-centered, high quality, compassionate, and respectful reproductive healthcare.

Position Summary:

- Performs patient assessment and assigns diagnosis based on recorded assessment data and current scientific research
- Establishes a plan of care and implements interventions in accordance with protocols, standards of care, and current research
- Provides early pregnancy loss evaluation and management
- Provides first trimester surgical and medical abortion care
- Provides second trimester surgical abortion care
- Performs post-abortion follow-up care

- Provides full spectrum contraception including all LARC options
- Provides prenatal, delivery, and postpartum care
- Provides gynecology services, including in-office and in-hospital surgical procedures, and LGBTQIA+ care. Double scrubbing for major cases and clinical training with Medical Director if desired.
- Participates in call coverage
- Contributes to the educational development of staff, patients, and self
- Demonstrates progressive leadership and effective management
- Advances own professional development through self-directed learning, continuing education and participation in peer review
- Initiates and maintains positive relationships with patients
- Initiates and maintains positive relationships with co-workers
- Takes responsibility for self-development and supports a learning environment
- Participates in efforts to achieve established goals for productivity

The Medical Director provides clinical supervision, and the executive leadership provide operational supervision. Position would involve providing services at Allegheny Reproductive Health Center and local hospitals in the Pittsburgh region. Physician will be hired as a full or part-time employee with excellent compensation and benefits.
